### **Manufacturers spare part leadtimes**

As you are probably aware, most manufacturers are currently struggling with supply chain problems and manufacturing leadtimes.

**There are a number of factors being quoted for these extended leadtimes, including : -**

Covid -19 staffing issues

Surge in demand

Shortages of materials / components

Brexit related delays

**Items that seem to be particularly affected are products containing : -**

Acrylic

Certain types of glass

Electronic components

Leisure Spares is working with the manufacturers to try and mitigate the effects of the above, but some extended spare part leadtimes are inevitable at the moment.

**The Leisure Spares team**
